Abstract

The paper focuses on the various aspects of manuscripts – Resources. Digital technology has made it more easy utilities in library speedy and comfortable to apply the stored intellect. This collected information through the ages has to used for further research, betterment and overall development of the society Electronic resources are easily accessible in remote areas.

Electronic resources solve storage problems and control the flood of information. Print sources are being digitized.

Keywords: E-Resources, E-Books,

E-Journals E-Newspaper and E-Thesis

1. Introduction:

A book document or piece of music written by hand rather than typed or printed. A manuscript is a handwritten or typed document, especially a writer's first version of a book before it is published and utilities in library resource is defined as a resource which required computer access or any electronic product that delivers a collection of data be it referring to full text bases, electronic journals, image, collections, other multimedia products and numerical, graphical or time bases, as a commercially available title that has been published with an aim to being marketed. These may be delivered on CD-ROM, on tape, via internet and so on. These are more useful due to inherent capabilities for manipulation and searching, providing information access is cheaper to acquiring information resources, savings in storage and maintenance etc and sometimes the electronic form is the only alternatives.

The library and information services of the 21st century are fast changing with the rapid development of electronic publishing libraries are not only acquiring reading materials such as printed books and journals but also arranging for providing access to various learning resources in electronic form.

2. Definition:

A written or typewritten composition or document as distinguished from a printed copy also: a document submitted for publication. The library owns the author's original manuscript.

According to AACR2, 2005 update, an electronic resource is: "Material (Data and / or program(S) encoded for manipulation by a computerized device. This material may required the use of a peripheral directly connected to a computerized device (e.g CD-ROM drive) or a connection to a computer network (e.g, the internet)" This definition does not include electronic resources that do not require the use of a computer, for example, music compact discs and video discs.

3. Review of Literature

1. The paper traces the barriers in collection of e-resources in the university libraries. The university libraries under the study have in sufficient number of internet nodes, low bandwidth, poor collection of CD ROM, databases and online resources.

2. Graham 2003 suggested electronic access to heritage material her paper suggested that heavily used materials to be digitized for easy access as well as to preserve the physical condition of materials.

4. Need of E-Resources

E-Resources enable the librarian to provide better service to the user community. The few considerable points are mentioned below:

- a) To get access to an information source by the more than one users.

- b) E-resources can be searched quickly.
- c) These can be found easily by the user.
- d) These resources can be stored in huge amount.
- e) Amount of time spent on the E-resources use

5. Utilities of E-Resources

two types of E-Resources

Now a days the reading materials and information sources are changing from print to electronic. Some of such E-information services are detailed and briefly discussed here:

S. No.	E-information services	Abbreviations
1	Current Awareness Service	CAS
2	Selective dissemination of Informati	SDI
3	E-Document delivery services	EDDS
4	Online Public Access Catalogue	OPAC
5	Current Awareness Service	CAS
6	Mobile Libraries	M-Libraries

6. Utilities of E-Resources

- a) E-publishing may be less costly than paper.
- b) E-Resources are created in any file format like text, audio, video and images.
- c) E-Resources are available for 24 hours of a day and save library space.
- d) The E-Resources search is easy because of user friendly interface.

Electronic Resources

e) They provide users faster more convenient and any time access from home, campus or library.

7. Characteristics of E-Resources

Access to every document by anyone from anywhere

- In electronic environment the interaction between user and librarian is frequent.
- No defined user group.
- The software can help the users in retrieving the desired information, hardly intermediate can help users.

8. Conclusion

The implementation manuscripts of E-resources is helpful to ensure exhaustive and pin pointed information. The e-resources utilities in library provide themselves various search options to the user and library manages. Using of e-resources enable the library to save space of library and time of the users. E-resources are useful for manuscripts in utility in library libraries as well as each and every users. Technology services are available in the present made wonderful changes in the library operations. Its advantages are for

technocrafts, usage of the electronic products improve the knowledge of user. Enhancement in infrastructure like high speed network, wi-fi in the campus, LAN portals at various rights to use points in the campus and also in departments can be prepared to improve the practice effectively.
